The performance of a student in a semester is indicated by a number called the Semester Grade Point Average (SGPA). The SGPA is the weighted average of the grade points obtained in all the courses taken by the student during the semester.

An up-to-date assessment from the time the student entered the programme of study is obtained by calculating Cumulative Grade Point Average (CGPA). It is calculated in the same manner as the SGPA.

Formula for percentage : $\text{Percentage} = (\text{CGPA} - 0.5) * 10$

In Diploma Programmes performance is indicated by SGPA and yearly Grade Point Average (GPA).

Formula for percentage: $\text{Percentage} = \text{GPA} * 10$
